INTERACTIVE WHITEBOARDS

PRESENT AND WORK COLLABORATIVELY

Enhance your learning environment and bring the classroom to life with the latest interactive whiteboard technology solutions by Techs4Education - delivering stunning graphics, richer sounds and engaging interactivity to the end users.

ARE YOU EXPERIENCING...?

- Having to replace expensive projector lamps?
- Touch continuously out of alignment, resulting in precious teaching time being wasted?
- Shadowing, faded areas and low brightness causing poor viewing experience?
- Projector fans loud and irritating?

If learning is being interrupted by old technology, it may be time for a change.

FEATURES & BENEFITS

- Multi-user collaboration allows multiple student or staff input at any given time
- Object awareness detection automatically makes pens write, fingers move and palms erase*
- Richer sound & stunning ultra high definition display
- Fully integrated mobile solutions so you can create a mobile classroom
- Long lasting warranties providing you value for money and peace of mind.

WHY TECHS4EDUCATION?

Techs4Education works with multiple suppliers meaning we can offer a variety of different makes & models giving your school complete flexibility when it comes to requirements and budgets. We provide a full service, which includes a survey to ensure the board is mounted securely, installed and set up correctly, as well as continued support.

Not sure if it's what your classroom needs? We can arrange a demonstration so that you can get a look and feel of the product before committing to a purchase.
