# SECURE REMOTE BACKUP

## A FULLY SECURE DATA BACKUP SOLUTION

Education establishments have heaps of sensitive data to manage. Data such as student information, personal details, financial records, audit and compliance records are just examples of the data handled on a day to day basis.

It's mandatory that schools keep this data secure and accurate, which is why you should ensure you're backing it up.

Techs4Education offer a remote data backup solution which is fully secure, using military grade encryption, and is hosted in the UK. Our fully managed solution means we'll install, maintain and continuously monitor the backups daily to ensure that everything is running smoothly and that your data is kept secure in our data vault. Giving you a completely hands off and hassle free experience.

## BENEFITS & FEATURES

- Daily back-ups - 7 days a week
- Daily reporting
- Flexible data limits that can be tailored to your requirements
- Protection against accidental deletion, hardware failure and data corruption
- Flexible restore options
- No hardware requirements
- Military grade encryption
- Proactive monitoring
- 3 month data retention as standard

## WHY TECHS4EDUCATION?

With tailored plans and flexible pricing, we'll ensure you have a secure remote backup solution that fits your school's requirements.

We're UK based and will provide friendly and expert support to any technical assistance you need. Building strong and personal relationships with our schools is the fabric of Techs4Education and we employ colleagues who are prepared to go the extra mile for clients.
